LT-19930216-GDJ

FORM AND DESIGN FEATURES

LT-19930216-GDJ is a segmented wood vessel, sculpted with multiple compound shape transitions on a lathe. A delineated form transition occurs between the cylinder-shaped neck and sphere-shaped body, and a continuous transition in form occurs between the sphere-shaped body and disk-shaped base. The visible geometric motifs are formed with contrasting wood species that are integral to the walls of the vessel, and include: a band of small stepped bars, and a concho belt of overlapping ovals, parallel lines, and human figures.

SPECIFICATIONS AND VALUE

Wood Species Used: Cherry, Red Gum, Birdseye Maple, African Padauk, and Black Walnut

Number of Pieces: 495

Approximate Weight: 2.2 lbs

Overall Dimensions: 9.5"T x 9.125"DIA

Opening Diameter: 2.25 inches

Production Year: 1993

Original Value: \$1,400

Current Value: \$2,920
