

FORM AND DESIGN FEATURES

LT-20220328-WHJ is a wood vessel hand-shaped and sculpted on a lathe. The body was formed and hollowed-out from a chunk of solid wood harvested from a tree. The form of this vessel is without historical reference to earlier pottery forms, and is thus Modern in form. The visible organic patterns of wood grain are integral to the walls of this wooden vessel. An abrupt transition in form occurs between the short neck of the opening and the convex body of the vessel.

SPECIFICATIONS AND VALUE

Wood Species: Mulberry

Number of Pieces: one

Approximate Weight: 2.4 lbs

Overall Dimensions: 5.25"T x 6.5"DIA

Opening Diameter: 4 inches

Production Year: 2022

Original Value: \$209

Current Value: \$213
