

FORM AND DESIGN FEATURES

LT-20220415-WHJ is a wood vessel hand-shaped and sculpted on a lathe. The body was formed and hollowed-out from a chunk of solid wood harvested from a tree. The form of this vessel is without historical reference to earlier pottery forms, and is thus Modern in form. The visible organic patterns of wood grain are integral to the walls of this wooden vessel. An abrupt transition in form occurs between the short concave neck of the opening and the convex body of the vessel, and another abrupt transition in form occurs between the convex body and concave base of the vessel.

SPECIFICATIONS AND VALUE

Wood Species: Mulberry
Number of Pieces: one
Approximate Weight: 2.4 lbs
Overall Dimensions: 3.875"T x 7.375"DIA
Opening Diameter: 5 inches
Production Year: 2022
Original Value: \$209
Current Value: \$213
